PREFACE

This fifth and last volume of the index to the 1840 federal census for the State of Illinois was taken from National Archives microfilm rolls M704-69 through M704-73.

As noted in the Preface to previous volumes, every effort was made to copy the names as accurately as possible but some of the spelling and penmanship was not very good.

Several forms of "Senior" and "Junior" were used but in this index all are shown as "Sr." and "Jr." Names with an "O" prefix were variously written (e.g. O'Brian, OBrian, Obrian) and in this index they were copied exactly as written.

There were peculiarities noted in several counties:

SANGAMON COUNTY - Ink blots on schedule sheet number 2 made it impossible to read two given names. Occasionally a "t" was not crossed, making it difficult to distinguish from an "l" unless the name was such that it had to be one or the other. The same holds true for "i" and "e" since the "i" sometimes was not dotted.

SCHUYLER COUNTY - The left hand side of schedule sheet number 90 appears to have been patched with tape and is not clearly reproduced on the microfilm. Some given names and initials on this sheet cannot be read. There are two schedule sheets numbered 104, however, the second is not a duplicate of the first. It appears, on the microfilm, as though a section of one schedule sheet had been taped to the other. All names listed on these two sheets are shown as Page 104 in this index. It was difficult to distinguish between "a" and "o", "g" and "y".

STEPHENSON COUNTY - The enumerator was not consistent in forming the letter "S" and, in some instances, it was difficult to differentiate between "S" and "T" unless the name was such that it could only be one or the other. The common problem of distinguishing between "S" and "L" was not as difficult as between "S" and "T".

ST. CLAIR COUNTY - There were a considerable number of French and German names and this compiler cannot be certain of some of them. Considering the strange spellings that resulted in some instances, it is obvious that the enumerator was not certain of the correct spelling. In other instances, names which obviously the same were spelled differently. Adding to the difficulty was the fact that the enumerator was not consistent in forming capital letters.

TAZEWELL COUNTY - The handwriting for this county was difficult to read and the enumerator was inconsistent in the formation of capital letters. The letters "H" and "M" as well as "I" and "J" were sometimes similarly formed.

UNION COUNTY - The common difficulty of distinguishing between "S" and "L" was compounded by the fact that the enumerator was not consistent in forming the letter "S".

VERMILLION COUNTY - Schedule sheet number 92, at first glance, appears to be blank, however, there is a faint trace of handwriting but it has faded so badly that it cannot be read. The enumerator was not consistent in forming the letter "W" and in some instances it was difficult to distingusih from an "H".

WABASH COUNTY - An "s" within or at the end of a name was so formed that it resembled an uncrossed "t". Schedule sheets 149 and 156 were duplicated on the microfilm. Although the handwriting for this county was very good, there was more than the usual difficulty in distinguishing between "L" and "S" unless the name was such that it had to be one or the other.

WARREN COUNTY - Schedule sheet number 174 was duplicated on the microfilm. Schedule sheet number 195 was blank.

WASHINGTON COUNTY - A line through the upper part of an "M" seems to have been used to designate a "Mc" prefix. Schedule sheet number 225 was duplicated on the microfilm.

WAYNE COUNTY - The following was printed or typed at the beginning of this county - "Schedules for Wayne County are continued on the reverse side of Page 271. The reverse side has no page number." The list of names for the county ended in about the middle of Page 271 and if there were names on the reverse side of the schedule sheet they were not reproduced on the microfilm. Perhaps this notation referred to recapitulation figures for the county.

WHITESIDE COUNTY - Many letters were poorly formed and the enumerator was not consistent enough to establish any sort of a pattern to use as a guide line. Many names could have been interpreted two or more ways (e.g. one name could have been either Higby or Hegley). Ink blots on three schedule sheets make four names partially illegible (Page 330 - 2 names, Page 331 - 1 name, Page 332 - 1 name). As much of the names as could be read have been included in this index.

WILL COUNTY - Letters were poorly formed and much of the handwriting was very difficult to read. In some instances a letter was a mere line or mark and reading it was largely a matter of interpretation. A double "l" and a "k" at the end of a name were formed almost the same so, again, it was a matter of interpretation.

WILLIAMSON COUNTY - The bottom of schedule sheet number 385 appears to have been patched with tape, making parts of the last three names difficult to read.

WINNEBAGO COUNTY - It was occasionally difficult to differentiate between an "h" and a "k" at the end of a name unless the name was such that it had to be one or the other. The enumerator also similarly formed "W" and "H".

In a number of instances throughout the counties in this volume the names were illegible, either partially or wholly. In other instances the enumerator omitted a given name. Whenever it was possible to do so such names were placed in their approximate alphabetical order within the index. Three names could not be alphabetized and will be found at the end of this index.

The format of this index includes the name of the head of the household followed by the county of residence and the census page number where the name was found. County abbreviations used in this volume are:

San - Sangamon
Sch - Schuyler
Sco - Scott
Shb - Shelby
Stk - Stark
Stc - St. Clair
Stp - Stephenson
Taz - Tazewell
Uni - Union
Ver - Vermillion
Wab - Wabash
War - Warren
Was - Washington
Way - Wayne
Whi - White
Whs - Whiteside
Wil - Will
Wis - Williamson
Win - Winnebago

Alphabetically, the present-day counties of Saline and Woodford would fall within the above group, however, they were not formed until 1847 and 1841 respectively. Anyone searching for persons who, in 1840, may have lived in the areas comprising these two present-day counties should check the parent county or counties (see map on Page vi).

Information for each household not included in this index but available on the microfilm includes:

1) Age statistics for household members - white.
2) Age statistics for free colored persons or slaves.
3) Number of persons in each household employed in mining, agriculture, commerce, manufacturing and trades, navigation of oceans, canals, lakes and rivers, learned professions and engineers.
4) Pensioners for revolutionary or other military service and their ages.
5) Age statistics for deaf, dumb, blind or insane white persons and whether public or private charges.
6) Age statistics for deaf, dumb, blind or insane colored persons and whether public or private charges.
7) Information on persons attending school.

Those who do not have access to the microfilm can obtain this additional information for 50¢ per head of household by writing to:

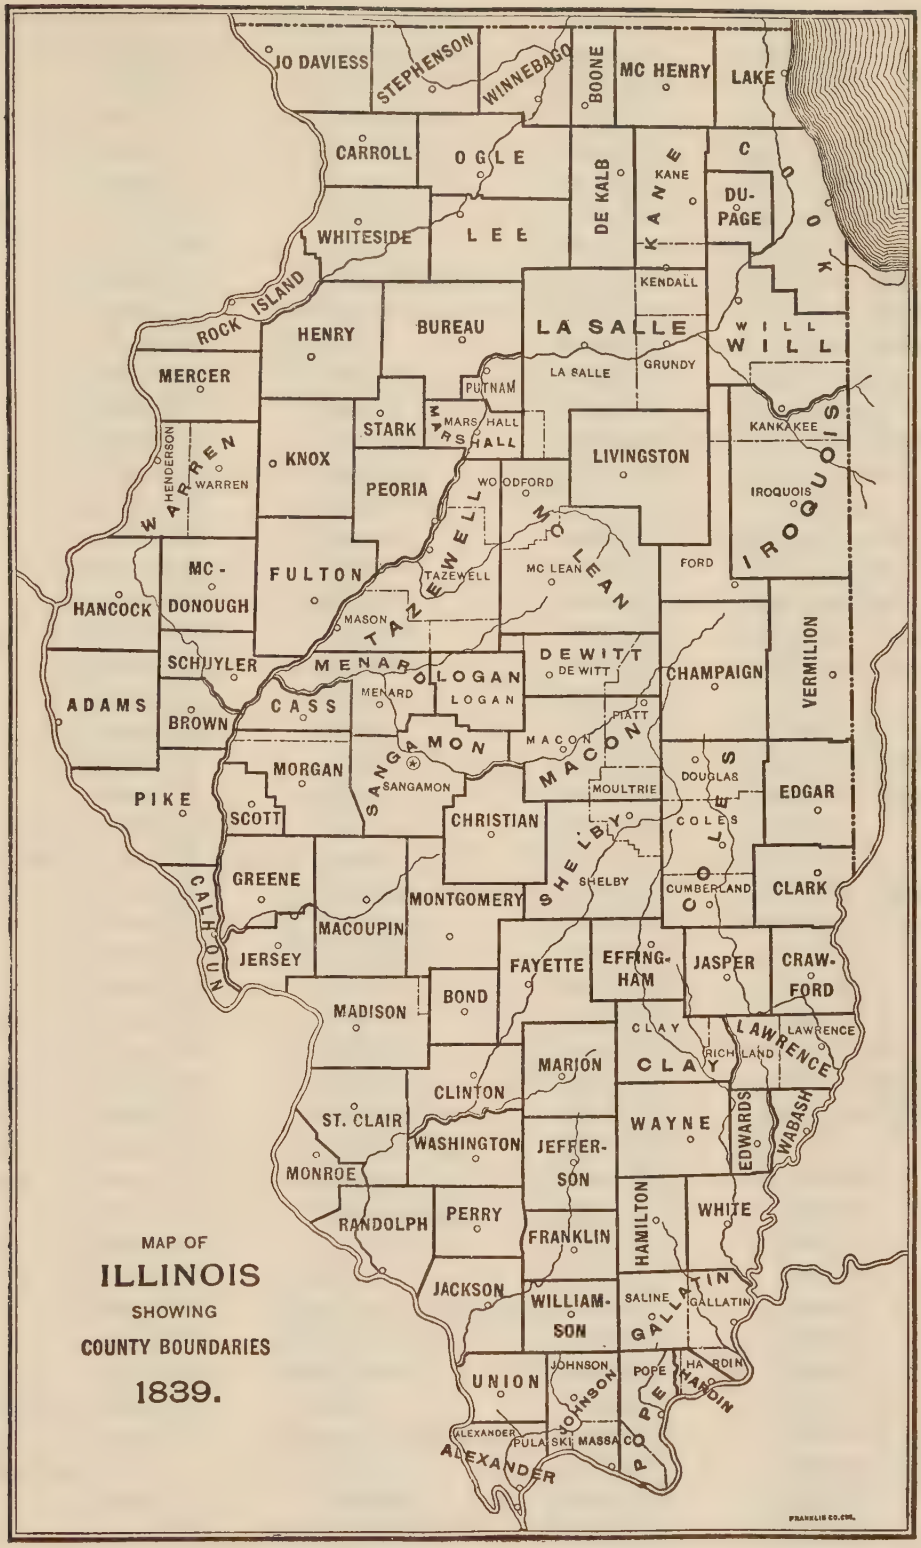
Ye Olde Genealogie Shoppe
P. O. Box 39128
Indianapolis, Indiana 46239

Please give the name of the head of the household, the county and page number in your request and include a stamped self-addressed envelope.

This volume concludes the index to all Illinois counties in existance in 1840.

Digitized by the Internet Archive
in 2026

https://archive.org/details/illinois-census-index_1979_5



No counties were formed during 1840. The above map is from Counties of Illinois, Their Origin and Evolution, Secretary of State's Office, Springfield, Illinois.
